The Vice Chancellor
Jaramogi Oginga Odinga University of Science and Technology (JOOUST)
P.O. Box 210 – 40601
Bondo, Kenya

CC: Prof. Samuel Liyala, Coordinator, Centre for eLearning (CFEL), JOOUST

Prof. Lorna Okotto, Director, Board of Postgraduate Studies, JOOUST.

RE: APPLICATION FOR ABSORPTION INTO ICT OFFICER POSITION

Dear Vice Chancellor,

I am writing to formally apply for absorption into an ICT Officer position at Jaramogi Oginga Odinga University of Science and Technology, following my current position as ICT Officer (eLearning & ODeL) since January 2026. I hold a Bachelor of Business Information Technology (BBIT) from JKUAT and bring over three years of progressive software development experience, which I have applied directly to strengthening the University's digital infrastructure.

Since joining JOOUST, I have served as developer and maintainer of several live, mission-critical institutional systems, including:

- **Postgraduate School Portal and Website** – supporting student applications, records management and supervisory assignments.
- **Centre for eLearning Website and Moodle LMS** – full customization, including bespoke PHP plugins for integrations, SCORM delivery, H5P content.
- **Exam Office Document Portal** – an online form submission and approval system. Digitizing of the existing manual and print based workflow.

I am also currently working on building of skills through practical development a School Management System on Microsoft Dynamics NAV, and an integration between the University's Dynamics NAV ERP and Moodle LMS using C/SIDE and C/AL, directly building capacity the University will need as it scales its ERP and eLearning systems.

Beyond development, I have provided first-line technical support and training to faculty and staff, administered MySQL databases and infrastructure across live systems, and maintained systems documentation to ensure continuity and knowledge transfer.

Given the depth of institutional knowledge I have built and my demonstrated commitment to the University's digital transformation agenda, I respectfully request consideration for absorption into a ICT Officer position. I am confident that continuing in this capacity, on a permanent basis, will allow me to deepen the impact already achieved and support the University's long-term systems roadmap.

I have attached my CV for your consideration and remain available for any discussion at your convenience. Thank you for considering my application.

Yours faithfully,

Stephen Mungai Mburu
ICT Officer – eLearning & ODeL, JOOUST

STEPHEN MUNGAI MBURU

ICT Officer (Software and Application) | AWS Cloud Practitioner

PROFESSIONAL SUMMARY

Motivated Bachelor of Business Information Technology (BBIT) graduate from JKUAT seeking absorption into an ICT Officer role. Currently serving as an Information Officer under the public service internship program and attached to Jaramogi Oginga Odinga University of Science and Technology (JOOUST) Center for E-Learning. I have greatly contributed to several institutional systems including the Postgraduate School portal, Centre for eLearning (CFEL) website and Moodle LMS. Actively involved in developing skills on Microsoft Dynamics NAV in order to integrate the University's Dynamics NAV ERP with Moodle LMS using C/SIDE and C/AL. Hands-on experience with cross-platform development, RESTful API integrations, relational database design, and enterprise system customization. Proficient in PHP, Python, SQL/MySQL, and Flutter/Dart, with practical exposure to REST, JSON, and SOAP integrations in live institutional environments.

CORE TECHNICAL COMPETENCIES

Cross-Platform Development	PHP, Python, JavaScript, Flutter/Dart across 6+ production apps — full SDLC across web and mobile.
API Integrations	RESTful (production-applied), JSON payload handling, OData awareness, SOAP consumption, OAuth2/JWT.
SQL / MySQL	Relational database design; complex queries,MySQL administration.
Institutional Systems	Developer of live JOOUST systems — postgraduate portal, eLearning website, Moodle LMS customization.
Systems Analysis & Design	Requirements elicitation, ER design, functional specification, solution architecture, data modelling.
User Training & Support	Trained and supported 100+ faculty and staff; first-line technical support; documentation and user guides.
Custom App Development	Custom android and desktop applications, REST integrations, Python automation tools — applied enterprise customization.
Cloud & Security	AWS Cloud Practitioner (certified); Cisco Ethical Hacking (2025); access control and data protection.

PROFESSIONAL EXPERIENCE

ICT Officer – eLearning & ODeL **Jan 2026 – Present**
Jaramogi Oginga Odinga University of Science and Technology (JOOUST) | Bondo, Kenya

Cross-Platform Development & API Integration

- Design, develop, test, and deploy institutional systems in PHP, Python, and Flutter/Dart across multiple concurrent production environments — web, mobile, and backend services.

- Build and maintain RESTful API integrations — OAuth2/JWT authentication, JSON payload handling, structured error management, and API versioning across institutional platforms; consume OData and SOAP services.
- Developed custom Moodle PHP plugins extending platform functionality: LTI integrations (BigBlueButton, Turnitin), SCORM delivery, H5P content, SSO, and gamification — directly applicable to ERP/LMS integration.

Relational Database Design & SQL

- Design and implement relational database schemas across multiple production systems — entity relationships, primary/foreign keys, normalized structures, and data integrity constraints.
- Write and optimize complex SQL/MySQL queries: multi-table JOINs, aggregations, subqueries, stored procedures, and views for reporting and data extraction.
- Administer MySQL — backup scheduling, replication, query optimization, performance monitoring, and integrity checks across four live institutional systems.

Institutional Systems Development — JOOUST Portfolio

- Postgraduate School portal and website — student applications, records and supervisory assignments.
- Centre for eLearning (CFEL) website — full Moodle LMS customization, plugins, and SSO.
- Manage the end-to-end SDLC for all systems — requirements analysis, database design, coding, testing, deployment, monitoring, and documentation.
- Provide technical and user support to 100+ faculty and staff; train end-users; maintain systems documentation and user manuals.

Systems & Mobile Developer **2023 – Present**
Freelance Consultant | Kenya

- Built Yurban (dual ride-hailing apps with payment integration), TourLast (booking platform with REST API and payment flows), M-Shop (retail ERP — inventory, billing, financial reporting), Medicare (healthcare records with role-based access), and Picture Puzzle (live on Google Play Store) — all delivered end-to-end.
- Applied RESTful, JSON, and third-party service integrations across all production applications; designed and implemented relational databases for each system.

ICT Lead **2024**
Don Bosco Technical Institute | Embu, Kenya

- Managed institutional software systems, user accounts, and technical support as sole ICT officer — full application development and maintenance responsibility as well as technical instructor.

EDUCATION

Bachelor of Business Information Technology (BBIT) **2018 – 2022**
Jomo Kenyatta University of Agriculture and Technology (JKUAT) | Kenya

Core coursework: Software Engineering, Database Management, Computer Networks, Systems Analysis & Design, Programming (PHP, Python, JavaScript, SQL), Web Development.

Software Development Cohort **May 2024 – Aug 2024**
Power Learn Project (PLP) Africa | Nairobi, Kenya

Python, web development, databases, API development, and collaborative software engineering.

CERTIFICATIONS

- AWS Cloud Practitioner – Amazon Web Services re/Start (2023) — cloud infrastructure, Windows Server integration, IAM.
- Cisco Ethical Hacking – Cisco Networking Academy (2025) — network security, access control, vulnerability assessment.
- DevNet Associate –Cisco Networking Academy
- Data Analysis- Udacity – Advanced data analysis in Excel and Python.
- Currently pursuing: Microsoft Certified: Dynamics 365 Business Central Functional Consultant Associate — targeted completion within 2026.

CHAPTER SIX & PROFESSIONAL BODY

All Chapter Six clearances available upon request: KRA Tax Compliance, DCI Good Conduct, EACC Clearance, HELB Compliance, CRB Certificate.

Computer Society of Kenya (CSK) — application in progress.

ICT Authority -ICTA (Systems and Applications)
